**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a computerized method for analyzing the job performance of guard patrols through monitoring specific patrol sites, classified in class 705, subclass 11.
  - II. Claims 7-29, drawn to a system and a computer program usable together for logging data concerning the history of guard patrols at specific sites, classified in class 702, subclass 187.
  - III. Claims 30-34, drawn to a method for scheduling rules for performing guard patrols, classified in class 705, subclass 9.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as evaluating job performance at a specific location in order to determine the thoroughness of patrol operations. In the instant case, invention II has separate utility such as the logging of data concerning the history of activity at specific patrol sites. Invention II solely facilitates the collection, storing, and downloading of the said data (i.e. no evaluation occurs). Invention III of the instant case has separate utility such as scheduling rules for patrol policy. Invention III requires information pertaining to the definition of a rule, such as its applicable date and time range, and utilizes this

information to create a regulatory schedule. This schedule also sets the mandatory number of checkpoint visits. Invention III does not take into consideration any evaluation or historic data when generating a schedule. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call occurred with Mr. Scott M. Oldham on 01/30/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beth Van Doren whose telephone number is (703) 305-3882. The examiner can normally be reached on M-F, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (703) 305-9643. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-7239 for regular communications and (703) 746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
